

MD-3639

Moisture Management Technology

What MD-3639 does:

- It stops moisture and diverts it to either side and away from moisture-sensitive wall details.
- It answers a critical need above wall openings.

How to install MD-3639*

- Position MD-3639 above wall openings (window, door, etc.) immediately above, but not in contact with, mounting flanges or flashing systems.
- Make MD-3639 watertight against moisture resistant coatings on masonry or poured concrete walls.
- Install flashing and overlap construction paper shingle-fashion on framed wall.
- Install MD-3639 with 1/4 inch to 1" slope-to-drain.
- MD-3639 must extend a minimum of 4" past window mounting flange or window trim boards on both sides of window.

Ordering and Shipping Information

Product Number	MD-3639
Piece Length (Feet)	4
Units per Tube	25
Linear Feet per Tube	100
